**Subject:** [External] Solar panels

Hello!

I recently heard of a plan Dominion energy has to increase the rates for solar panel users. I would like to include my opinion as a solar panel owner. This is a very bold move from a company after making consumers pay for the failed nuclear power plant. Consumers should not be charged more for wanting to use solar power to reduce their energy use. As is when you have an excess of energy they reimburse you at a far lower rate then what you pay when you do not generate enough energy to cover your usage. Please do not allow them to proceed with this.

Thank you
